Education

Master's degree in Artificial Intelligence

Master's degree program

Beijing Institute of Technology

September 2026 - July 2029 (Expected)

Bachelor's degree in Software Engineering

Bachelor's degree program

Yunnan University

September 2022 - July 2026

GPA: 3.85/4.00 (1/99)

Grade: 90.61/100.00

Thesis: Design and Implementation of a Knowledge Graph-Based Collaborative Multi-Agent Drug Recommendation System

Research Publications

CDNE: Community deception from node and edge perspectives

Yan Kang (Mentor), Jiajun Tang, Baochen Fan, Hu Yuan

Neurocomputing, 2026

Application of graphsage in financial fraud detection within dynamic social networks

Jiajun Tang

International Conference on Electrical Drives, Power Electronics & Engineering, 2025

Projects

Large Language Model-Based Medical Diagnosis Assistance System

CRAIC Provincial Project

Overview: Used LLMs to generate medical-concept triples for knowledge graph completion, built personalized patient knowledge graphs, and fused discharge summaries, drug labels, and other features to improve drug recommendation. Implemented a dual-end architecture: doctors consult via a web-based HIS, while patients use a mini-program for registration or an AI Q&A assistant for triage.

Knowledge Graph-Based Collaborative Multi-Agent Drug Recommendation System

Graduation Project

Overview: Developed KGCMADR, a knowledge graph-based collaborative multi-agent drug recommendation model with five agents: task planning, clinical analysis, strategy preference, drug interaction, and treatment recommendation. The Strategy Preference Agent uses DPO to balance historical continuity and current response. It integrates multiple medical knowledge graphs to improve accuracy, safety, and interpretability. A full-stack prototype was built using Spring Cloud, Flask, and Vue 3.

Awards

National Scholarship

Provincial "Five-Good Student" Award

First-Class Scholarship (Three Consecutive Years)

2025 China Robotics and Artificial Intelligence Competition

The 10th Group Programming Ladder Tournament (GPLT)

The 2025 ICPC Xi'an Invitational Contest

The 16th Lanqiao Cup Contest

China Undergraduate Mathematical Contest in Modeling

Yunnan Province

Yunnan University

National First Prize

National Second Prize

Bronze Medal

National Third Prize

Provincial First Prize

Technical skills

**Programming Languages
Frameworks & Tools**

Python, C, C++, Java, Typescript, HTML, CSS, L^AT_EX
Pytorch, Huggingface, Modelscope, Vllm, Origin, Overleaf, Codex,
Claude Code, Openclaw

Language proficiencies

English Passed CET-4 (552) and CET-6 (550)
